

Two Miracles Attributed to Rev. Dr. Martin Luther King, Jr.

The first of two miracles were on Dr. King's birthday, January 15th 2009. It is described as the "**Miracle on the Hudson**". Flight 1549 landed on the Hudson River with 155 passengers aboard and no one was seriously injured. The second of two miracles were depicted in the 2019 film '**Breakthrough**'. It was on Monday, January 19, 2015 on the celebration of Dr. King's birthday in which John Smith fell through the ice in a Missouri lake and was dead for 45 minutes; only later to return to life. Each year displays the same calendar. In other words, January 15th was on a Thursday and the year consisted of 365 days. **This is also true for the year of 1925; the year in which Malcolm X was born.**

An additional note:

In 1968 Dr. King was assassinated. During that year of 366 days, Dr. King's birthday, January 15th was on a Monday. It was a time prediction of the celebrated holiday!
