### **Abstract**

The medical community has established that the brain and fingerprints to some extent develop simultaneously. Fingerprints are formulated between the 13th and 18th week of prenatal growth. We can also say that in addition to environmental factors such as tension and pressure upon the digits, fingerprints are created as a result of our genetic makeup. Human intelligence is also a consequence of our genetic material. It would therefore be a logical conclusion to associate ability or talent with the dermal ridge arrangements.

A person who is exceptional may maintain a fingerprint frequency in the billions of less than one percent. This may occur on more than one digit. There are gifted individuals and many of them display fingerprint frequencies only to be found on the other side of the spectrum. I decided to look into history to discover unique individuals and sought after their fingerprints to make this point. Such a person was Jimi Hendrix.

**Keywords:** *Jimi Hendrix, fingerprints, radial loop, NCIC FPC, fingerprint frequencies*

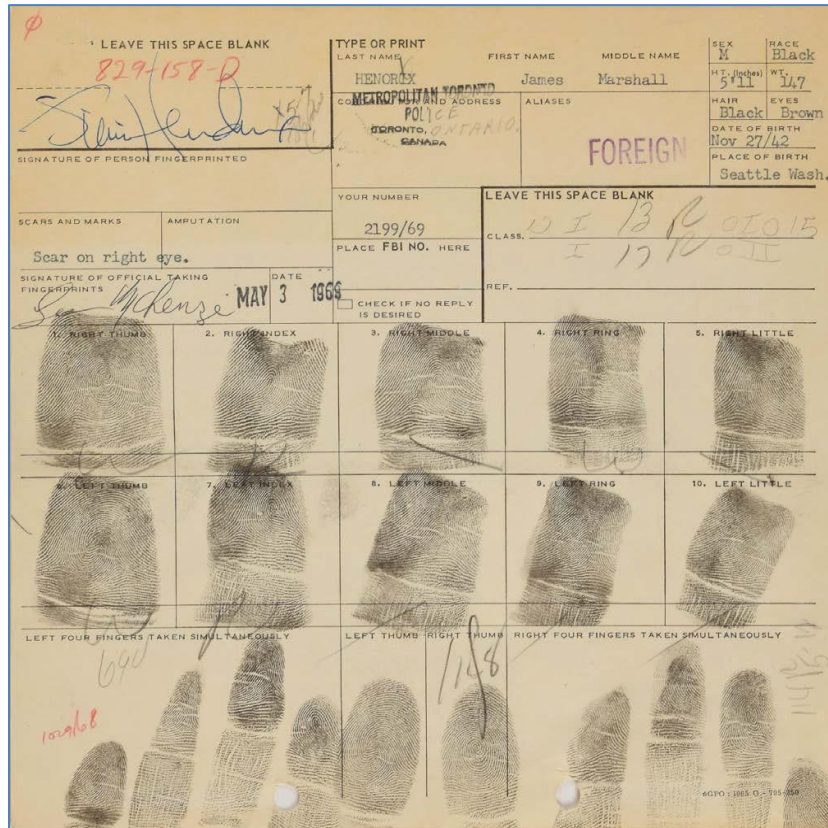

### **Jimi Hendrix Fingerprints**

Jimi Hendrix (1942 - 1970) played the guitar above and beyond the required extend, an ability unparalleled over time. It stands to reason that fingerprint frequencies are noted within his hands. It is clear to see how in this case the Radial Loop fingerprint pattern is associated with rare talent. Jimi Hendrix displayed a Radial Loop on his right and left index fingers. According to the Henry Classification on his fingerprint record, Hendrix's right index fingerprint was a Radial Loop with a ridge count of 12. John Lennon, another musical genius also had a Radial Loop on the right index with a ridge count of 12 [1]. In a study of 17,951,192 males conducted by the FBI in 1993, only 0.920880352 percent of the total, 165,309 individuals displayed a Radial Loop with this distinction [2]. In addition, Hendrix's left index was a Radial Loop with a ridge count of 14; the NCIC FPC=64. This was 98,692 of the total. A percentage rate of 0.549779647. And so, it is noted that Jimi Hendrix being a left-handed guitarist displayed a Radial Loop on the left index at a frequency rarer than the frequency of the Radial Loop on his right index finger. I have noted that President Lyndon B. Johnson also displayed Radial Loops on the right and left index fingers at frequencies less than one percent [3], according to the FBI study cited in this text.

The right ring finger of Jimi Hendrix was a Central Pocket Loop Type Whorl pattern with an outer tracing. The NCIC FPC is CO. In the referenced FBI study from 1993, 1,348,378 individuals displayed the classification of CO on the right ring finger. Malcolm X also had a classification of CO on the right ring finger [4] which was 7.511356349 percent of the total. Jimi's Left thumb was a Double Loop Whorl pattern with an inner tracing (Figure 1). President John F. Kennedy also displayed a Double Loop Whorl on the left thumb with an inner tracing [5]. The NCIC FPC=DI. This is 2,206,636 individuals from the total of the aforementioned study. It was 12.29242047 percent. Both whorl

patterns from President Kennedy and Jimi Hendrix were counterclockwise in appearance! A listing of frequencies is referenced [6].

**The RCMP Henry Classification for Jimi Hendrix's fingerprints was as follows:**  $\frac{12\ I\ 13\ R\ O\ IO\ 15}{I\ 17\ R\ O\ II}$

A photograph of a Canadian RCMP fingerprint card for Jimi Hendrix. The card is filled out with handwritten and printed information. At the top left, there is a red handwritten number '829-158-D' and a signature. The top right section contains personal details: LAST NAME 'HENDRIX', FIRST NAME 'James', MIDDLE NAME 'Marshall', SEX 'M', RACE 'Black', HT '5'11', WT '147', HAIR 'Black', EYES 'Brown', DATE OF BIRTH 'Nov 27/42', and PLACE OF BIRTH 'Seattle Wash.'. The middle section includes 'YOUR NUMBER' '2199/69', 'PLACE FBI NO. HERE', and 'CLASS.' 'I 13 R O IO 15'. The bottom section shows ten individual fingerprints (1-10) and three simultaneous impressions (LEFT FOUR, LEFT THUMB RIGHT THUMB, RIGHT FOUR). The date 'MAY 3 1966' is stamped. There are various handwritten notes and signatures throughout the card.
